THE New York election law require that the inspectors of election shall file that the inspectors of election shall file their returns within twenty-four hours after the election is over with the County Clerk, in the county where the election is held. This will necessitate delay, but it is hardly possible to believe that the courts of the State of New York will set aside the will of the people, simply because the official spents of those people, in some instances, were not good lawvers and made a few technical blunders. The will of the yoote, as expressed in his bailwill of the voter, as expressed in his bal-lot, should never be reversed because the official who counted that ballot dld not official who counted that ballot did not make a strictly legal return of it. This is a well established law. The claim that Blains is elected rests entirely on the hope that the technical legal errors already discovered, and that may yet be discovered, will be used by the courts to reverse the expressed wishes of the people. This is a very slender thread on which to hang a claim, and the effrontery necessary to make it with the confidence which it was done by the Republican National Committee has a tendency to create an uneasiness in the public mind National Committee has a tendency to create an uneasiness in the public mind which must have a protracted depression on business. But the people must remember that party committees are always expected to claim everything with confidence. Again, a committee which has suffered a crushing defeat when it little expected it, must be generously allowed to let itself down so as not to jar its constitution. Looking at the claims of the Republican National Committee in this light, the public should be moved more by a feeling of pity than anger.
